LARGE MICA GRAPHITE

Large Mica is a 91cm wide decorative wallcovering with a stone texture and granite hues that's available in 13 colourways.

Description	The wallcovering collection Graphite comprises endless variations on mica, a mineral formed out of a chemical reaction between quartz and granite. Exposed to extreme heat, the mineral expands into pieces 2000% or even 3000% of their original size, in a spectrum of brilliant colours. The natural sparkle of the mineral pieces enhance the dark tones while conferring a mother-of-pearl glow to the lighter colours. Creating designs that concentrate on the inherent uniqueness of the mineral, Graphite is a collection that defies explanation.
Composition	Mica sparkles on paper backing
Environmental Info	The materials contained in these wallcoverings are naturally occurring and renewable resources harvested from farms and coloured with water-based inks.

Care Instructions	Mica wallcoverings should be handled with care, as they are not stain repellent treated. Remove liquid stains immediately using a clean, white, soft, damp cloth tapping on the wallcovering lightly. Use of a vacuum cleaner is not recommended. Always test in an inconspicuous area first. If care instructions don't deliver the expected results, cease cleaning method immediately and contact Baresque for assistance.
Warranty	2-year warranty. Visit **baresque.com.au/warranty** for complete details.
Additional Comments	Search Graphite to find other designs in this collection.
