Care Instructions

While Tekloom® is inherently stain resistant, it is important to keep it clean at all times to maintain the original look and feel. Spot cleaning with a clean, soft towel with clean water will remove most of the everyday stains.

Cleaning Code: W/S, Bleach (10:1), Dry Care™

DISINFECTION

Tekloom can be disinfected with a 10:1 bleach dilution of water/bleach.

Apply the solution using a misting spray bottle and gently scrub the affected area with a sponge or soft bristle brush. Allow the mixture to linger for the time specified by the facility.

Avoid soaking the seamed area to prevent the bleach from penetrating thru the protective layer.

Rinse all cleaning agents thoroughly with water and wipe with a soft cloth

Residue left by cleaning agents will degrade and shorten the life and/or affect the product's appearance if not removed.

Always test in an inconspicuous area first.
