

HEAT SHIELDING MIRROR

Wallcoverings » Architectural Film

Brand: **Sangetsu**

Collections: **Glass Film**

Applications: **Glass**

CLEAS Heat Shielding Mirror is a high-performance glass film that reduces solar heat and glare, provides UV protection, maintains clear visibility, and enhances energy efficiency with a reflective mirror finish.

Description

CLEAS Heat Shielding Mirror combines solar control performance with a reflective mirror finish, helping to reduce heat gain and glare while enhancing the appearance of glazed surfaces. Designed to improve interior comfort and energy efficiency, it provides UV protection to help minimise fading and damage to interior furnishings and finishes.

Manufactured using high-transparency polyester film, it delivers excellent optical clarity for a clear external view while helping to block up to 97% of infrared heat. Suitable for residential, commercial and hospitality applications, it offers a durable and stylish solution for improving the performance of windows and glazed surfaces.

Composition

High-clarity polyester (PET) film with functional coating, and durable scratch-resistant finish

Care Instructions

Clean using a soft cloth or rubber squeegee with clean, warm water.

For more persistent soiling, use a mild neutral detergent diluted to 1–2% with water. Gently wipe the surface in a single direction, then rinse thoroughly with clean water to remove any residue.

Do not scrub back and forth, as this may damage the surface.

Do not dry-wipe, as this may cause fine scratches.

Avoid leaving dirt or debris on the surface, as this may accelerate wear. Regular cleaning is recommended to maintain appearance and performance.

Do not use ammonia-based cleaners, chlorine-based cleaners, organic solvents, or abrasive cleaning agents.

Do not apply stickers, tape, or labels to the surface, and avoid writing on the material. Prevent any actions that may scratch or damage the film.

Warranty

2-year warranty. Visit baresque.com.au/warranty for complete details.
