Description

Vernice is a digitally printed mural wallcovering characterised by flowing layers of colour and softly defined organic forms. The abstract composition creates depth and visual movement while maintaining a calm, balanced aesthetic. Subtle tonal shifts and painterly effects give the design an artistic quality, making it well suited to hospitality, workplace, residential, healthcare, and public environments. Vernice reflects a contemporary interpretation of Italian design, bringing colour, texture, and atmosphere to modern interiors.

Constructed as a Type II 20 oz. vinyl mural wallcovering, Vernice combines decorative appeal with commercial-grade durability. The four-panel mural format allows the large-scale design to flow seamlessly across feature walls and expansive interior settings, creating a cohesive architectural statement. Manufactured in the USA and backed with osnaburg, Vernice is free from phthalates, formaldehyde, heavy metals, and PBDEs, while meeting low VOC indoor air quality standards. The result is a durable, low-maintenance wallcovering solution that balances artistic expression with long-lasting performance.

Composition

Type II vinyl wallcovering with osnaburg backing (452 g/m²)

Environmental Info

Developed with a focus on healthier interiors and responsible manufacturing, this Type II vinyl wallcovering offers a balance of performance, durability and environmental transparency. The material is free from phthalates, formaldehyde, heavy metals (RoHS) and PBDEs (brominated flame retardants), while its low VOC formulation supports improved indoor air quality in commercial environments.

It is recyclable and supported by both a Health Product Declaration (HPD) and Environmental Product Declaration (EPD), providing transparency around material ingredients and environmental impact. Manufactured under a comprehensive materials recovery and reuse program, the product helps reduce production waste and promote more efficient use of resources throughout the manufacturing process.
